BEAM

CROSS 6 ARTICULATED BEAM

The Matikgate Cross 6 articulated beam is a premium access control solution designed for locations where standard barrier beams cannot be used due to limited overhead clearance. The articulated beam folds as it raises, making it ideal for underground car parks, multi-storey parking facilities, warehouses, and sites with low ceilings. Engineered for reliability and high-duty operation, the Cross 6 delivers fast, smooth opening and closing cycles while maintaining exceptional durability in demanding commercial and industrial environments.

FEATURES

- Manufactured in Portugal by Matikgate
- Solution for limited overhead clearance
- Efficient and safe movement
- Used with the CROSS 6 barrier

DATA

Articulated beam for CROSS 6 barrier	
Manufacturer	Matikgate (Portugal)
Product	Articulated beam for CROSS 6 Barrier
Feature	Solution for limited overhead clearance
