CROSS 6 SKIRTED BEAM

CROSS 6 SKIRTED BEAM

Designed with a 6 metre beam fitted with a full-length safety skirt, the barrier helps prevent pedestrians or cyclists from passing underneath the beam while it is in the closed position, reducing the risk of unauthorised access and improving site safety. Built for intensive daily operation, the Cross 6 delivers fast, reliable opening and closing cycles with a robust motor and durable construction suitable for car parks, business parks, distribution centres, and private developments.

The Matikgate Cross 6 with skirted beam offers a professional, secure, and highly visible traffic management solution for entrances requiring maximum safety and reliability.

FEATURES

- Manufactured in Portugal by Matikgate
- Full length safety skirt
- Prevents access under the barrier beam
- Used with the CROSS 6 barrier
