COPPER TRANSMITTER

COPPER TRANSMITTER

The Copper radio transmitter has been designed with style in mind. Unlike other transmitters on the market, the Copper transmitter is a square, compact and tactile transmitter with 4 stylish buttons that can be used to operate automation at a simple touch of the button. The Copper coloured metal edge gives the transmitter a robust and elegant finish.

Operating on either fixed or rolling code, the transmitter can deliver an encrypted rolling code to prevent cloning with an insight range of 25 meters.

The Copper transmitter can operate up to 4 automated units. With the ability to operate the transmitter as either a rolling code or fixed code, the transmitter not only delivers on elegance but on practicality.

FEATURES

- Manufactured in Portugal by Matikgate
