FAAC B614 BARRIER

B614 BARRIER

The FAAC B614 24v electromechanical barrier is aimed at both the residential and light commercial market. The robust components and materials make the B614 a reliable barrier.

The beams, fitted with a rubber anti-impact profile, are available in both rectangular and rounded versions.

Optional reflective stickers and LED lighting along the entire length of the beam (rounded or rectangular) make it easy to see even in conditions of poor visibility. A quadrilateral lever system with two reduction stages makes beam movement even smoother.

FEATURES

- Manufactured by FAAC
- IP55 rated
- Power Supply: 220-240v ~ 50/60 Hz
- Maximum beam length: 2.5-6 meters
- Optional RED/Green traffic light crown
- Optional beam LED lighting
- Left or right handed

DATA

FAAC B614 Barrier	
Manufacturer	FAAC
Product	B614 barrier
Barrier height	1163mm
Barrier width	305mm
Barrier depth	230mm
Beam length	2.5-6 meters
Power supply	220-240v ~ 50/60 Hz
Drive motor	24v Electromechanical
Protection Class	IP55
Operation	Continuous
Operating temperatures	-20c to +55c
Warranty	1 year

Environment

The FAAC B614 24v electromechanical barrier is aimed at both the residential and light commercial market.

Options
